📄 **2) Prompt + Response - Multiturn**

A Multi-turn conversation strings together multiple prompts and responses. For example, a 3-turn conversation would look like:

- Prompt 1 / Response 1 ->
- Prompt 2 / Response 2 ->
- Prompt 3 / Response 3
- *End of conversation*

REMEMBER: In **Multi-Turn** conversations, there are multiple prompts and responses, each prompt and response **builds off the context** provided in the previous prompt and response. After the initial prompt and response, the conversation continues with additional questions, clarifications, or responses, ultimately forming an extended dialogue.

⚠️**It's extremely important to *maintain continuity* in the multi-turn prompts. In case the task fails to fulfill this, - the task will receive an automatic 1 or 2** ⚠️

- If the minimum number of turns is two or more, then **your task requires you to add the minimum number of turns.**
- Every prompt after the first *must* relate to the category and subcategory and continue a natural conversational flow as a follow-up to the previous response.
